NEW QUESTION: 3

Which three items would be in appropriate use case for "Data Management" in Enterprise Planning and Budgeting Cloud (EPBCS)? (Choose three.)

A. An organization requires the ability to process data from multiple chart of accounts

B. An organization requires the ability to build dimension hierarchies

C. An organization requires the ability to load data to their application via flat files.

D. An organization requires the ability to map data from multiple chart string segments to a single dimension

E. An organization requires the ability to provide "Drill-back" capabilities.

Answer: A,C,E

Explanation:

Explanation/Reference:

A: You can drill through to the detail from the EPM target application and view data in the Enterprise Resource Planning (ERP) source system. Predefined by administrators, drill-through reports are available to users from specified individual member cells and data cells. A cell can be associated with multiple drill-through reports. Cells that contain drill-through reports can be indicated on the grid by a cell style.

B: Data loads and write-back are supported for those users who do not have a direct connection to their Enterprise Resource Planning (ERP) source data, but have data available from their source in a text file.

Any file, whether it is a fixed width file or a delimited file, can be easily imported into an Oracle Enterprise Performance Management Cloud application.
