NEW QUESTION: 1

What is the BEST location in a network to place Virtual Private Network (VPN) devices when an internal review reveals network design flaws in remote access?

- A.** In its own separate Virtual Local Area Network (VLAN)
- B.** In a dedicated Demilitarized Zone (DMZ)
- C.** Outside the external firewall
- D.** At the Internet Service Provider (ISP)

Answer: B

NEW QUESTION: 2

You are designing a service layer endpoint named EndPoint1 that will read more than one million rows from a database named DB1, and then update several rows in multiple tables in a database named DB2.

You need to identify a data access strategy that meets the following requirements:

- * Uses the OData protocol to retrieve data from EndPoint1
- * Creates a strongly typed object based on the table in BD2
- * Retrieves data from DB1 as quickly as possible, while minimizing memory use on the application server

What should you identify for each requirement? To answer, drag the appropriate data access strategies to the

correct requirements. Each data access strategy may be used once, more than once, or not at all. You may need

to drag the split bar between panes or scroll to view content.

Answer:

Explanation:

Explanation

NEW QUESTION: 3

Which of the following statements best describes an activity in a project?

- A.** It is a listing of all project work that must be accomplished for the project scope to be considered complete.
- B.** It is the effort needed to complete a work package.
- C.** It is the unit of resource utilization needed to complete a project deliverable.
- D.** It is a defined set of functions a resource must complete for the project scope to be considered complete.

Answer: B

Explanation:

An activity is the effort needed to complete a work package. The activities are linked to the work packages in the WBS. An activity is the element of work performed throughout the various stages of a project. It is a group of people, communications, processes, and work items that correspond to a joint effort to achieve a goal. An activity is a way to manage the work collectively with others in any organization. The create WBS process identifies the deliverables at the lowest level in the WBS, called the work package. Project work packages are divided into smaller elements known as activities, which correspond to the work required to complete the work package. Answer option D is incorrect. This is a definition of all the work that the project team and manager must complete in order to complete the total activity list. Answer options A and C are incorrect. These are not valid definitions of an activity.

NEW QUESTION: 4

You execute the following commands to audit database activities:

Which statement is true about the audit record that generated when auditing after instance restarts?

- A.** One audit record is created for every successful execution of a SELECT, INSERT OR DELETE command, and contains the execution plan for the SQL statements.
- B.** One audit record is created for the whole session if john successfully executes a SELECT, INSERT, or DELETE command on a table, and contains the execution plan, SQL text, and bind variables used.
- C.** One audit record is created for the whole session if JOHN successfully executes a select command, and contains the SQL text and bind variables used.
- D.** One audit record is created for every successful execution of a SELECT, INSERT OR DELETE command on a table, and contains the SQL text for the SQL Statements.
- E.** One audit record is created for the whole session if john successfully executes a SELECT, INSERT, or DELETE command, and contains the execution plan for the SQL statements.

Answer: D

Explanation:

In 12c by session no longer inserts only one audit record. It creates one record per successful auditing conditions.
