NEW QUESTION: 1

You work for a manufacturer who needs to advertise its catalog of products online using a SharePoint 2010 publishing site. A page author will create a Web page for every type of product the manufacturer makes. Each Web page will display the name of the material the product is made from and a photo of the product. You need to design this site to satisfy the following requirements: *When the page author creates a new Web page for a product, the author should only be able to choose from a list of five materials. .The manufacturer's marketing manager should be able to add to the list of materials at any time without assistance from the IT department. .Users can choose to view the site in English, German, or Spanish. A user should see the name of the product material in only the language they have selected. .The URL of the page should remain the same for each type of product regardless of the language the user has selected. Which approach should you recommend?

- A.** Create a site column of type "Choice" for English, German, and French, and add the translated list of materials to the site column for each language. Add all three site columns to the page layout. Give the marketing manager permission to edit the Choice site column values for each language.
- B.** For each type of product, create three Web pages, one for each language. Give the marketing manager permission to edit all the product Web pages.
- C.** Use the Managed Metadata Service to create a set of terms used for product materials and translate each term into English, German, and Spanish. Add a site column mapped to the term set to the page layout. Make the marketing manager the term set owner.
- D.** Create a resource file for each language and install the resource file using a SharePoint solution package. Show the marketing manager how to edit the resource file.
