NEW QUESTION: 2

An e-commerce order fulfillment web server should generally be placed on which of the following?

A. Internal network

B. Demilitarized zone (DMZ)

- C. Domain controller
- D. Database server

Answer: B

Explanation:

Explanation/Reference:

Explanation:

An e-commerce order fulfillment web server should be placed within a DMZ to protect it and the internal network from external attack. Placing it on the internal network would expose the internal network to potential attack from the Internet. Since a database server should reside on the internal network, the same exposure would exist. Domain controllers would not normally share the same physical device as a web server.
