both in practical and theoretical terms, To exam candidates like you to avoid those situations, we offer the best way to help you improved with our H12-421-ENU sure-pass torrent materials.

NEW QUESTION: 1

When troubleshooting a network problem, browsing through the log of a switch, it is discovered that multiple frames contain errors. In which of the following layers does the problem reside? (Select TWO).

- A. Layer 2
- B. Layer 3
- C. Layer 5
- D. Data link
- E. Transport layer
- F. Physical layer

Answer: A,D

Explanation:

Explanation

Layer 2 of the OSI reference model is the data-link layer. Components of the data-linklayer include frame-format, Media Access Control (MAC) addressing, protocol identification and error detection.

When data is being sent, it is split into protocol data units (PDUs) as it passes through the layers of the OSI model. The PDUs have different names as they are passed through the layers of the OSI model. In layer 2, the PDU is called a 'Frame'.

The most common protocol specified in the data-link layer is Ethernet and the most common network component in the data-link layer is a network switch.

Inthis question, problems are discovered with Ethernet frames by examining the logs in a network switch.

Therefore, for this question, we are working in Layer 2, the data-link layer.

NEW QUESTION: 2

MOTS is an acronym for:

- A. Mission, Objectives, Training, Supervision
- B. Modified Off-The-Shelf Software
- C. Management Oriented Testing System
- D. Manipulated Object Training Series
