### **NEW QUESTION: 1**

You need to recommend which tasks must be performed to meet the compliance requirement for the marketing department.

Which three actions should recommend?

To answer, move the three appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Select and Place:

### **Answer:**

Explanation:

Explanation:

Box 1: Create a new retention policy tag. Box 2: Create a new retention policy. Box 3: Run the Set-Mailbox cmdlet.

Note:

\*From scenario: Compliance Requirements All of the email messages in the Sent Items folder of each user in the marketing department of Contoso must be deleted automatically after 365 days.

\*You can use retention policies to group one or more retention tags and apply them to mailboxes to enforce message retention settings. A mailbox can't have more than one retention policy.

\*Messages are expired based on settings defined in the retention tags linked to the policy.

These settings

include actions such moving messages to the archive or permanently deleting them.

Before applying a retention policy to one or more mailboxes, we recommended that you test the policy and

inspect each retention tag associated with it.

\*After you create retention tags, add them to a retention policy, and apply the policy to a mailbox user, the

next time the MRM mailbox assistant processes the mailbox, messages are moved or deleted based on

settings you configured in the retention tags.

Reference: Exchange 2013, Apply a Retention Policy to Mailboxes  
Reference: Create a Retention Policy

### **NEW QUESTION: 2**

The authentication scheme, authorization scheme, accounting scheme, HWTACACS, or RADIUS server template created on the AR router can take effect only after it is applied in the domain.

**A.** False

**B.** True

**Answer: B**

### **NEW QUESTION: 3**

You are developing a stateful service to deploy to Azure Service Fabric. You plan to implement the RunAsync method.

You need to implement the methods to interface with an instance of the IReliable dictionary interface to increment a count each time the service is called. The first time the service is called, you must initialize the count to 1 if it does not yet exist and then update it by one each time it is called.

Which three methods should you run in sequence? To answer, move the appropriate methods from the list of methods to the answer area and arrange them in the correct order.

**Answer:**
