Our HPE6-A69 study materials are compiled by the experienced professionals elaborately.

### **NEW QUESTION: 1**

The materials manager has noticed that several items were created and assigned to various inventory organizations, but the analyst skipped the Copy from Template step. The manager would like to know how to correct the items. Which three statements are true? (Choose three.)

- A.** You can change an organization-level attribute with the Master Item window. If you do this, it will update the organization-level attribute across all organizations.
- B.** You can use the Item Attribute Copy form to update the value of an item attribute across multiple organizations in a given organization hierarchy.
- C.** You can use the Organization Item window to update organization-level item attributes. This would update organization-level attributes in your current organization only.
- D.** To update master-level attributes, use the Master Item window. If an attribute is controlled at the master level, the value of the attribute applies for all organizations to which the item is assigned.
- E.** Apply the template in the organization item. It would automatically update the Master Item window.

**Answer: B,C,D**

### **NEW QUESTION: 2**

If you are configuring MP-BGP routing for MPLS Layer 3 VPNs, when should the redistribute connected command be used?

- A.** when the PE is supporting more than one VRF instance for the same customer CE
- B.** every time the MP-BGP redistribution function is enabled
- C.** when the customer requires a static default route to be advertised
- D.** when the customer does not have CE routers and the PE is the default gateway

**Answer: D**

### **NEW QUESTION: 3**

What does this function perform: Administration Center Health Monitor > Resync Health Monitor Password?

- A.** For each server monitored by the Health Monitor, it creates the ADMIN ID, sets a default password, and generates a Q ADMIN report.

**B.** It synchronizes the ADMIN\_CENTER password among all IBM Tivoli Storage Manager servers monitored by the Health Monitor.

**C.** For each server, it runs the Q ADMIN ADMIN\_CENTER command. If an ID does not exist, it creates one; if it is locked, it unlocks it and sets the password to the current password used by the Administration Center.

**D.** For each server, it runs the Q ADMIN ADMIN\_CENTER command. If an ID does not exist or if it is locked then it fails and sets the password to the current password used by the Administration Center.

**Answer: C**
