Explanation
The AWS Documentation mentions the following
Amazon S3 offers access policy options broadly categorized as resource-based policies and user policies.
Access policies you attach to your resources (buckets and objects) are referred to as resource-based policies.
For example, bucket policies and access control lists (ACLs) are resource-based policies. You can also attach access policies to users in your account. These are called user policies. You may choose to use resource-based policies, user policies, or some combination of these to manage permissions to your Amazon S3 resources.
Option B and D are invalid because these cannot be used to control access to S3 buckets For more information on S3 access control, please refer to the below Link:
https://docs.aws.amazon.com/AmazonS3/latest/dev/s3-access-control.htmll The correct answers are: Use Bucket policies. Use 1AM user policies Submit your Feedback/Queries to our Experts
