NEW QUESTION: 1

The amount of data a company must back up has been increasing, and storage space is quickly running out.

There is no budget to purchase new backup software that is capable of backing up data directly to the cloud.

What is the MOST cost-effective way to make storage available to the company's legacy backup system?

- A. Use AWS Snowball on a weekly basis to transfer data to Amazon Glacier
- B. Launch an Amazon EC2 instance, add large Amazon EBS volumes, and connect using VPN
- C. Use AWS Storage Gateway to present a VTL using iSCSI to the legacy application
- D. Ship backup tapes to AWS for storage in secure AWS Availability Zones

Answer: C

NEW QUESTION: 2

NEW QUESTION: 3

DRAG DROP

You have a website that displays text, pictures, video files, and audio files. The website processes requests from countries and regions all over the world. You plan to migrate the website to the Azure platform.

The website has the following requirements:

Encode, store, and stream audio and video at scale.

Load-balance communications with the website instance that is closest to the user's location.

Deliver content with high-bandwidth and low latency.

You need to recommend the technologies to implement the solution.

Which technologies should you recommend? To answer, drag the appropriate technology to the correct requirement. Each technology may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

Select and Place:

Answer:

Explanation:

Explanation/Reference:

* MediaServices

Azure Media Services is being used to power consumer and enterprise streaming solutions worldwide.

Combining powerful and highly scalable cloud-based encoding, encryption and steaming components, Azure Media Services is helping customers with valuable and premium video content to easily reach larger audiences on today's most popular digital devices, such as tablets and mobile phones.

* TrafficManager

* Azure Content Delivery Network

The Azure Content Delivery Network (CDN) is designed to send audio, video, applications, images, and other files faster and more reliably to customers using servers that are closest to each user. This dramatically increases speed and availability, resulting in significant user experience improvements.

NEW QUESTION: 4

A customer has a single frame IBM TS4500 Tape Library with six 3592-E07 drives. A new open systems server was recently purchased and, because of budget constraints, the customer has decided to use less expensive LTO-7 tape media and drives while protecting investment in existing tape cartridges.

What is the most economical way to achieve this goal?

- A. Add six LTO-7 drives in the existing frame
- B. Replace 3592 drives with LTO-7 drives in existing frame
- C. Replace the frame and add LTO-7 drives
- D. Add six LTO-7 drives in a new frame

Answer: A
