NEW QUESTION: 1

You have a server named Server1 that runs Windows Server 2012 R2. Server1 has the File Server Resource Manager role service installed.

Server1 has a folder named Folder1 that is used by the human resources department. You need to ensure that an email notification is sent immediately to the human resources manager when a user copies an audio file or a video file to Folder1.

What should you configure on Server1?

- A. a file screen
- B. a file screen exception
- C. a file group
- D. a storage report task

Answer: A

Explanation:

Explanation/Reference:

Explanation:

Create file screens to control the types of files that users can save, and generate notifications when users attempt to save unauthorized files.

With File Server Resource Manager (FSRM) you can create file screens that prevent users from saving unauthorized files on volumes or folders.

File Screen Enforcement:

You can create file screens to prevent users from saving unauthorized files on volumes or folders. There are two types of file screen enforcement: active and passive enforcement. Active file screen enforcement does not allow the user to save an unauthorized file. Passive file screen

enforcement allows the user to save the file, but notifies the user that the file is not an authorized file. You can configure notifications, such as events logged to the event log or e-mails sent to users and administrators, as part of active and passive file screen enforcement.

NEW QUESTION: 2
